
HOW THE REPAIR AND RETURN ORDERING PROCESS WORKS?

This is a Repair Service of your existing ABS module. You will need to remove and send your module to us for repair.

HOW THE REPAIR AND RETURN ORDERING PROCESS WORKS?

1

Place your order

Place your order on our website or by calling our toll-free line 1-888-712-2525.

HOW THE REPAIR AND RETURN ORDERING PROCESS WORKS?

2

Check your e-mail

The order will be processed during our regular business hours (Mon-Fri 8:30 – 5:00 EST). After processing your order, we will email shipping labels and shipping instructions. If you do not see shipping labels within 1 hour of submitting your order (during business hours), please first check your junk/spam folders. If you still do not see the labels, please contact us at 1-888-712-2525.

HOW THE REPAIR AND RETURN ORDERING PROCESS WORKS?

3

Ship your part to us

Remove the module from your vehicle and pack it securely in a box roughly the same size as your module. Please ensure that you follow the shipping instructions provided.

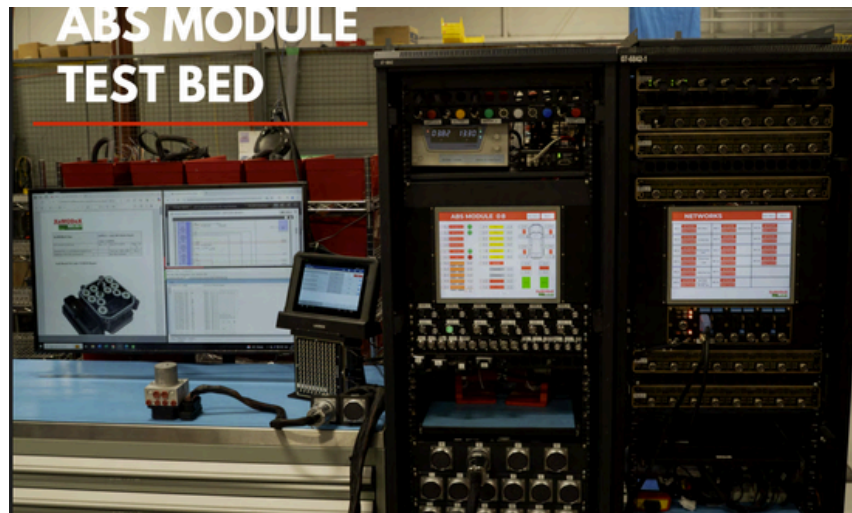

HOW THE REPAIR AND RETURN ORDERING PROCESS WORKS?

4

Testing and repair service

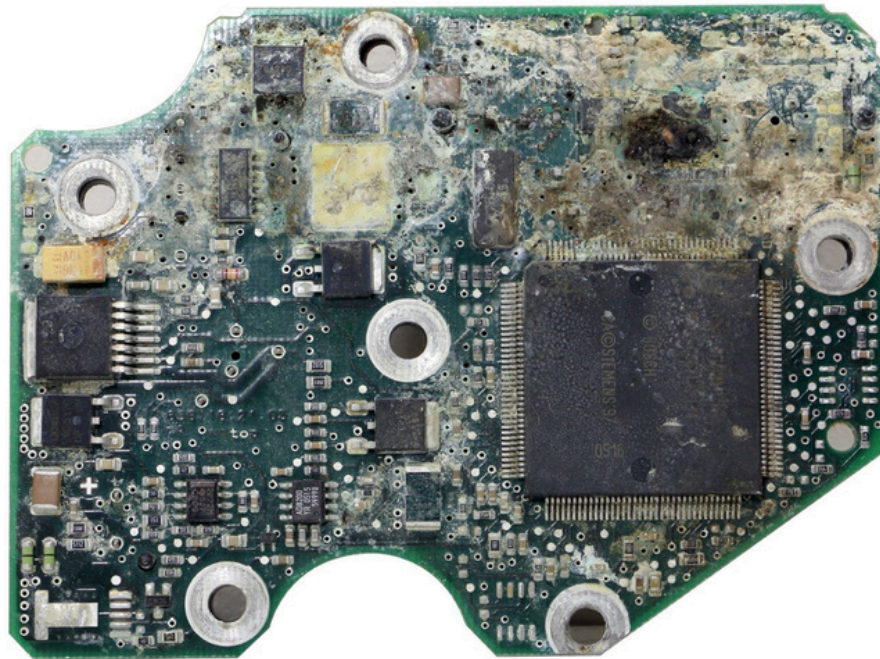

Quality Tested: Your module will be tested in our latest generation ABS test bed. Click [here](#) for more info. (insert link to how we test)

Failure Confirmation: The goal is to be able to reproduce the failure in our test bed. This confirmation enables us to validate our repair, but most importantly avoid the unnecessary once. Should your module exhibit no faults present during the initial test, we will contact you with recommendations.

WATER DAMAGED PCB

Can all types of failures be fixed? We strive to achieve a 100% repair success rate; but the reality is, some modules are damaged beyond repair. Water and fire damaged units are very tricky to revive; in these cases, it might be possible to transfer software to the donor unit. If that is not possible, we'll refund the repair service costs, less the diagnostic bench test fee of \$75.00 dollars.

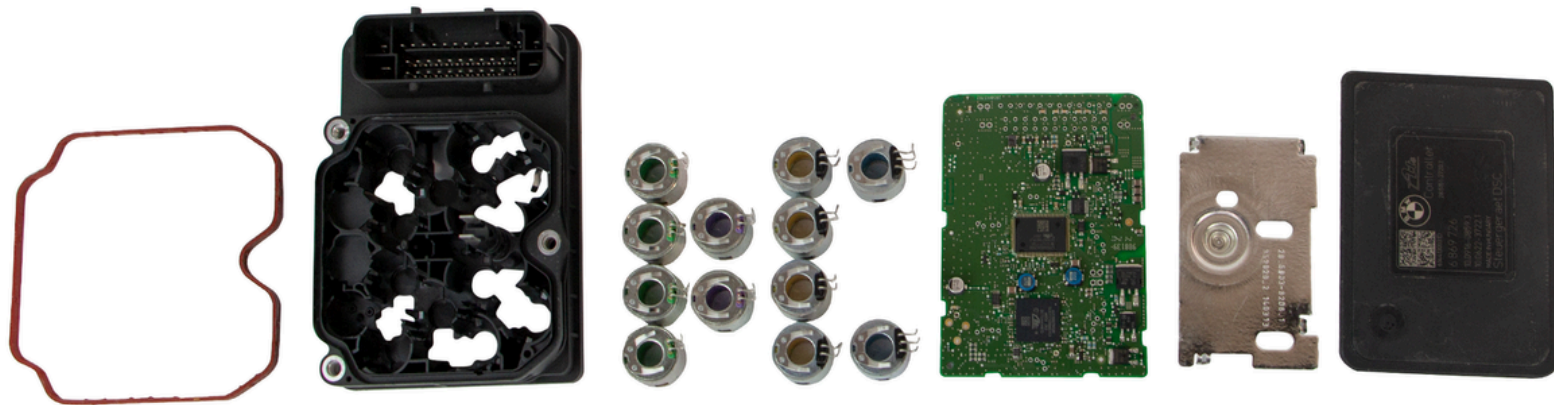

HOW THE REPAIR AND RETURN ORDERING PROCESS WORKS?

5

Turnaround time

Quick Turnaround: Given the complexity of the remanufacturing process. We strive to complete the repair within 2-3 business days.

HOW THE REPAIR AND RETURN ORDERING PROCESS WORKS?

6

Shipping the repaired module back to you

Once the repair is completed, your module will be securely packaged and shipped back to you. At the end of the day, you will receive an email notification from UPS with tracking details.

HOW THE REPAIR AND RETURN ORDERING PROCESS WORKS?

7

Reinstallation

Plug & Play Installation: Since we are working on the original module, that's been already programmed and calibrated to the vehicle, there is no need to modify any software or calibration settings. This makes the module a simple plug and play installation.
